

Regents' Lecture
Thursday, March 21 4-5 p.m

**"Beyond 2002: Trends, Developments and Opportunities in Communications
Science and Engineering"**

WHO: Dr. Arun N. Netravali, chief scientist at Lucent Technologies, will speak on the revolution in communications technologies, and the underlying science and technologies of silicon, optics, wireless and software that will spawn an immense variety of natural, network-based services.

The lecture is hosted by Dr. Charles Tu, chair of the Electrical and Computer Engineering department at UCSD's Irwin and Joan Jacobs School of Engineering. In cooperation with the California Institute for Telecommunications and Information Technology, the lecture can also be viewed at: <http://www.calit2.net/events/3-21-netravali.html>.
