White Paper Format
ECE 172A class projects

~1 Page, Due Friday, Nov 07 2008

General Guidelines

Be concise and to the point. No need to write more than one page in 12 pt. font. Submit by email to shankarts@ucsd....before midnight on Friday.

A. Description of Problem

What is the basic purpose of the project? What are the problems, needs and/or values that justify the project?

Who will benefit from it... potential applications?

B. Overview of the Existing Literature

What published work exists, related to the project. Include References at the end of the white paper. Refer to the references by their number as shown below.

Example : In their work related to person tracking[1]...

C. Project Activities

What exactly must be done in order to achieve the desired outcomes – List some prominent steps in your project?

D. Evaluation

What datasets/infrastructure exist/need to be developed to validate your project results?

E. References

Published work related to the project. Be discriminative here and include the relevant research from reputed universities and groups.

For listing References, use the following example as a template:
